

Setting up your AT&T GoPhone Account

Step 1) Before setting up your account be sure to turn on your camera and enter the Date, Time, Temperature and Battery Type.

Step 2) Program the camera with your phone number and/or email address using the “Security Settings” Software (See page 3 of the Cellular Upgrade Manual).

Step 1 and 2 are critical, as the camera will forward any text messages sent by AT&T to your phone email during the account setup process.

Carrier Text Message Notifications

When you set up an account on-line, the carrier will often send a text message with your password to your new phone number (your camera). The camera will automatically forward any text messages it receives to the contacts you specify when you set it up.

The camera will check for incoming messages every time it connects to the network to send images. If you need to get your account setup password text fairly quickly, you will want to arm your camera, and then trigger it to take a photo. At the same time it sends the photos, it will forward any text messages that are queued up for that phone number.

Step 3) To setup an AT&T GoPhone account you will need the information provided on the label inside the camera (above the LCD). The label includes Carrier information as well as:

1. SIM Card Number (ICCID)
2. IMEI Number

TIP: There is also space provided on the back page of the manual to record these numbers.

Setup an AT&T GoPhone Account

AT&T no longer allows “text-message-only” devices on the Mobile Share plan. Therefore the ONLY option is to create a (pay-as-you-go) GoPhone Account for your camera(s). The easiest way to setup a GoPhone Account is through the AT&T Website.

**NOTE: Do NOT go to an AT&T Store
Do NOT call AT&T to setup your camera,**

GoPhone (pay-as-you-go) Plan

You can set up an account on-line at: www.att.com/shop/wireless/gophone.html

Click on the “[Activate your phone](#)” Link under “New Customers - Activate Account” near the upper right corner to get started.

- 1) **Activate Your Device** - Enter your SIM Card Number (ICCID), and click “Continue”
(The SIM Card Number (ICCID) is printed on the label inside your camera above the LCD)

Activate Your Device

Thank you for choosing GoPhone from AT&T!

If you already have a phone number assigned and just need to add money to your account, go to [Manage Your Account](#).

Replacing Your Phone?

**Are you replacing your phone?**

If you already have wireless service with AT&T and you have the SIM card from your previous phone, all you need to do is insert the SIM card into your new phone and you are all set. You do not need to activate your new handset.

If you are replacing your phone and do not have the SIM card from your previous phone, or you are replacing a lost or stolen phone, please read the “Need a SIM Card?” directions on the right side of this page.

In support of the Consumer Safety & Stolen Device initiative, AT&T does not allow the use of stolen devices on our network.

To Begin Activation, Enter Your SIM Card Number

To begin activation or to check the activation of your new GoPhone Pay As You Go service, please enter your AT&T SIM card number below and click the “Continue” button.

* SIM Card Number ?

Field denoted by asterisks (*) are required.

- 2) **About Your Device** - Enter your ZIP Code and IMEI, and click “Continue”

About Your Device

Enter ZIP Code and IMEI Number

Please enter your ZIP Code and IMEI, then select the ‘Next’ button.

*Service ZIP Code ?

*IMEI ?

Fields denoted by an asterisk (*) are required.

You can find your IMEI number in the package your device came in. The IMEI number is on the outside package on a white label with a bar code. Look for the 15-digit number following “IMEI”.

If you do not have the package, you can locate the IMEI number on your new phone by following these steps:

1. Be sure your phone is turned on. (If the battery in your phone isn’t charged yet, you might need to plug the charger into the phone.)
2. Press these keys on the phone, one by one: *#06# (star-pound-zero-six-pound).
3. You should see a long number on the screen. (This may not work for all phones.)
4. If you see that number, enter only the first 15 digits, skipping any spaces, dashes, or other symbols that you may see. If you do not get a number on your screen, please follow the direction on the right side of this page.

- 3) **Personal Information** - Enter Name, email, Address, etc and click “Continue”

- 8) **Activation Successful** – Be sure to write down your Wireless Number and Passcode. Click "Yes" to Add Money and setup your text messaging.

Activation Successful

[Print this page](#)

Congratulations! Your phone has been successfully activated.

Account Details

Be sure to write down your GoPhone wireless number or print this page before proceeding.

Your New Wireless Number: [REDACTED]

Your New Passcode: [REDACTED]

Your Rate Plan: **10¢/Minute Plan**

Your account passcode is the last four digits of your wireless phone number. You will need this passcode to access Online Account Management (att.com/mygophone) and Automated Customer Service (1-800-901-9878) from a wireline/landline phone.

GoPhone service from AT&T is subject to Terms of Service. A printed copy of the Terms of Service is included in your User Guide in your GoPhone package.

Add Money

To use your newly activated GoPhone, you will need to add money to your account. You must add money within 26 days, or your account will be deactivated. GoPhone offers several options:

- Set up Auto Refill using a credit card, debit card, or checking account
- Use a GoPhone Refill Card or PIN receipt.
- Make a one-time payment using a credit card, debit card or check.

If you would like to add money to your account now, please click the "Yes" button. If you would like to add money to your account at a later time, call 866-707-5550 to add money and manage your account...

No Yes

- 9) **Add Money** - Select how you would like to pay for your plan (One Time, AutoPay). Click "Continue" (**See "Auto-Renew vs Auto-Refill" info below**)
- 10) **Add Money/Features** – Select "Messaging Packages"
 Messaging packages options include 200, 1000, or Unlimited.
 We recommend selecting the "Unlimited" package to avoid getting any overage fees.
 Select the appropriate package and click "Add to Cart".
- 11) **Add Money/Features** – Click "Check Out"

Applicable taxes and fees will be added to this amount. In many jurisdictions certain recurring fees or taxes will be debited from your account balance as allowed by law. Taxes may include State, County, City Sales Tax and an E911 Fee. The E911 fee is a fee that applies to every prepaid wireless service transaction at the time of replenishment if such fee exists in the customer's taxing jurisdiction. An additional fee in Wisconsin that may be included in the tax total is the WI Police & Fire Protection Fee.

New Debit Card ▾

AT&T Auto-Renew vs. Auto-Refill (On GoPhone Accounts)

"Auto-Renew" refers to automatically renewing your messaging plan every month. Don't confuse this with "Auto-Refill". The "Auto-Refill" option will allow you to set up the account so that when the balance runs down to \$0.00, AT&T will automatically bill your credit card to re-fill the account with money.

If you do not choose "Auto-Refill" and your account runs out of money, your messaging plan will stop and your camera will no longer send you images – until you re-fill the account by putting some more money into it.

NOTE: It is important when you set up your messaging plan that you choose the "Auto-Renew" option. Otherwise, after one month AT&T will start charging you \$0.25 per picture that your camera sends. This can drain the funds from your account very quickly.

Text Message Count

If the camera is setup to send a message to more than one phone number or email address, each email and phone number will count as one text; (e.g. two phone numbers and one email address, will count as THREE text messages for each photo sent).

If you are sending messages to multiple recipients we highly recommend you set up an unlimited messaging plan for each cellular camera.

NOTE: Once you setup an account your SIM card is locked to that account. The only way to switch accounts is to have a new SIM card installed in your camera at the factory. There is a \$30 charge to swap out the SIM card for a new one.

(If the camera is opened by anyone other than RECONYX the warranty is void.)

Disclaimer

All plans and rates listed above are subject to change at the discretion of AT&T. These figures are given simply to illustrate what we have found to be AT&T rates/plans in effect as of December 2013. We make no claim that these plans or rates will be available at any point in the future.
