

***NOW AVAILABLE!***

***RT1350 Wireless Remote Trigger & Illuminator\****

*The RT1350 is a new wireless security device from RECONYX™ that allows you to disguise or hide your RECONYX™ Surveillance Camera*

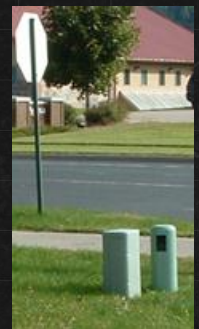

● Utilizing the RT1350 for Surveillance

- ✓ *With the wireless capability of the RT1350, your SC950 or SM750 camera can now be hidden with only the lens exposed, or it can be placed securely inside of a building or vehicle and take pictures through a window.*
- ✓ *The RT1350 remote can perform motion detection and illumination capabilities in conjunction with the camera; the camera and remote communicate wirelessly to take pictures and illuminate the scene at night.*
- ✓ *Since the remote has the appearance of a camera, it can also be used as a functional decoy. If the remote is found, the subject may know they were under surveillance but will think that they have found the camera - while the actual images are safely stored on the camera in a hidden or secure location.*

● Accessories

- ✓ **HyperFire Utility Box** - This security enclosure is designed to look like a utility box, making it virtually invisible in many industrial/urban/suburban applications. Designed for either standalone camera use or can be paired with a remote (Shown in above left image).
- ✓ **Artificial Rock** - Ultra-Realistic polyurethane rock with mounting hardware and cutout hole for lens. Allows the camera to be hidden when used in conjunction with remote. (Shown in above right image.)
- ✓ **Cable Box** - Designed for standalone camera use with or without the remote. Blends in well in urban/suburban setting to hide camera in plain view. (Shown at right.)

RECONYX™ Security products are ideal for covert surveillance in locations where no power or communication lines exist - including construction sites, boat docks, oil and gas wells, utility substations, illegal dumping sites, graffiti targets, road sides, marijuana plots, remote border areas and more.

\* The RT1350 must be paired with a remote enabled Security or Professional Series camera.

Pricing: RT1350 = \$349.99; Transceiver for Camera = \$99.99; SC950 or SM750 Camera = \$649.99.
